DETAILED ACTION

Claims 108-129 are pending in this application.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 108-112 and 117-127, drawn to an implant composition, classified in class 424, subclass 484.
- II. Claims 108 and 113-127, drawn to an implant composition, classified in class 424, subclass 484.
- III. Claim 128, drawn to implant composition, classified in class 424, subclass 682.
- IV. Claim 129, drawn to method of modulating resorption, classified in class 424, subclass 696.

The inventions are distinct, each from the other because:

Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects. Group I contains a modulator that increases the resorption rate of PCA calcium phosphate and Group II contains a modulator that decreases the resorption rate of PCA calcium phosphate. Because these two compositions have different effects they are unrelated inventions. Group III contains a calcium phosphate of any type not necessary of PCA type and any agent that recognizes the calcium phosphate to modulate resorption and

Art Unit: 1616

Group IV is a method of resorption of a bioceramic composition. The bioceramic material could be any type of bioceramic material such bioactive glass, which is different from the preceding claims. Because of these reasons groups I, II, III and IV are unrelated inventions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Claims 108-129 are under restriction requirement.
